SUMMARY

Developer Relations leader with a decade of experience across Web2 and Web3: building communities, owning partner relationships, producing documentation, and running global hackathons. Former software engineer (JavaScript, Rust, Solidity). Currently at EQT Partners as a QA Engineer on LLM-powered internal platforms, bringing structured quality thinking to complex technical products. Passionate about making APIs and platforms genuinely valuable to the developers who build on them.

Core Competencies: DevRel Strategy · Developer Advocacy · API Documentation · Community Growth · Technical Content · Platform Launches · Ecosystem Partnerships · Support Automation

KEY ACHIEVEMENTS

- Led rebrand and launch of Storacha (formerly Web3.Storage) — global event in Bangkok.
- Grew Chromia's developer community from 20K → 120K Twitter followers; represented the ecosystem at AfriDevCon with 600+ developers - all organic, no paid growth.
- Designed EQT's first LLM platform adoption program: 13 user interviews, analytics across 480 users, findings adopted into engineering roadmap, enablement reaching 190 AI Champions.
- Built Concordium Academy (Rust tutorials); delivered workshops at major blockchain events globally.
- VP of Geek Girls Carrots — scaled a global NGO to 250,000 members for women and non-binary folks in tech, partnering with 60+ global brands.
- Published technical content on API design, smart contract security, and decentralized storage.

EXPERIENCE

EQT PARTNERS — QA ENGINEER

2026 – Present

- QA owner for Tally (EQT's proprietary LLM data agent) serving ~2,000 employees firm-wide.
- Designed and ran the platform's first user research program; findings adopted into engineering roadmap.
- Built adoption strategy: cluster-based outreach across 16 segments, workshops for business teams.
- Leading revival of EQT's Core Dataset Radar, defining business owner accountability across data domains.
- Cross-functional work with data, finance, HR, and investment teams on data reliability and governance.

HAKIERKA AB — SENIOR DEVELOPER RELATIONS CONSULTANT

Independent DevRel consultancy supporting Web2 and Web3 companies

2021 – Present

Protocol Labs — Storacha (formerly Web3.Storage)

- Led DevRel strategy and executed a full ecosystem rebrand to Storacha.
- Produced documentation, technical content, and developer onboarding materials.
- Organized a global launch event in Bangkok featuring Pangina Heals.
- Represented Storacha at ETHGlobal and other major hackathons.

Serverpod

- Led DevRel initiatives for an open-source backend framework for Flutter.
- Drove developer engagement, technical content, and outreach strategies.

Concordium

- Delivered workshops at major blockchain events.
- Created Concordium Academy with Rust tutorials.
- Managed Ambassador program and social media strategy.

Aragon - Vocdoni

- Led DevRel and community strategy for secure blockchain voting.
- Authored Solidity content and expanded community and social media presence.

Hype

- Delivered hackathons, developer programs, and community initiatives for major Web3 ecosystems including Algorand, Fuel, and Flow.

CUDOS - SENIOR DEVELOPER RELATIONS MARKETING

2021-2022

- Managed DevRel social media for a Layer 1 platform combining cloud and blockchain.
- Launched mainnet and grew Discord by 60%.

CHROMAWAY/CHROMIA - DEVELOPER ADVOCATE

2018-2021

- Led Developer Advocacy for a Layer 1 blockchain and relational database.
- Executed full ecosystem rebrand from Chromapolis to Chromia.
- Supported projects including My Neighbour Alice, Mines of Dalarnia, and Chain of Alliance.
- Grew Twitter from 20K → 120K and featured Chromia at AfriDevCon with 600+ developers.

SOFTWARE DEVELOPMENT EXPERIENCE

- JavaScript Engineer — Gears of Leo (2018)
- Front-End Developer — AFRY (2017–2018)
- Front-End Developer — Fotografiska (2016–2017)
- Front-End Developer — Daftcode (2015–2016)

LEADERSHIP & COMMUNITY

GEEK GIRLS CARROTS - VICE PRESIDENT

2015 - 2018

- Global NGO, 250,000-member community for women and non-binary folks in tech; 60+ global brand partners.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Rust, Solidity, Dart, Python, Ruby

Frameworks: React, Flutter

EVM Tools: IPFS, AI/LLMs, Smart Contracts, Snowflake, Notion

Soft Skills: Public Speaking, Technical Writing, Community Building, Event Management, Support Automation, Partner Onboarding

EDUCATION

- Master of Law — University of Wrocław
- Front-End Developer Bootcamp — Coders Lab

IF WE EVER MEET AT A CONFERENCE...

I'll ask what you're building •

I'll probably talk too fast •

Sooner or later I'll start talking about video games •
